Education:

University of North Carolina at Charlotte Coding Bootcamp   Sept. 2019

University of North Carolina at Chapel Hill   Dec. 2017
Degree: Bachelor's in Mathematics

Project Experience:

MessengerApp
- Created an app utilizing Node.js, Express.js, and Passport.js for authentication, where users can create and log into their own account and create posts and messages, maintained in a MySQL database through Sequelize.
  Heroku Link: https://thawing-scrubland-09930.herokuapp.com/

SharkNo
- Created an app within Node.js for users to report and search for shark attacks in a given area and timeframe via the use of API calls and MySQL queries to interact with a connected database.
  Heroku Link: https://sharkno.herokuapp.com/

MyCalculator
- Utilized React to create a calculator app that uses JavaScript to construct the mathematical logic for solving user-input calculations.
  Heroku Link: https://benny-calculator.herokuapp.com/

PichuAdventure
- Utilized JavaScript to manipulate the Document Object Model and the HTML tag <canvas> in order to create a survival game based on the Pokémon series.
